# Transport Justice

## Designing fair transportation systems

Presentation of K. Martens (2017), *Transport justice. Designing fair transportation systems*, Abingdon: Routledge

For the last fifty years the focus of transportation planning and policy has been on the performance of the transport system and ways to improve it, without much attention being paid to the persons actually using – or failing to use – that transport system. This book develops a new approach to transportation planning that takes people as its starting point, and justice as its end.
